Spring 1920

Apple Opportunities In Small Orchards

MORE home markets of this country should be supplied by local orchards. Here is one of the greatest opportunities in fruit growing today. There are thousands of communities now served mainly by far-away sources, which offer big revenues to local growers. Such growers have an unusual advantage; first, because they are in close touch with the market and can cater to its tastes; second, because they can supply a variety of first three-beautifies.

with the market and can cater to its tastes; second, because they can supply a variety of fruit throughout the season to regular customers; third, because they save the long freight haul and refrigeration, which is an added profit in itself.

The local market has been sadly neglected. There is a great money-making opening for properly cared for orchards in and around every center of population, and wise fruit growers will take advantage of it.—The Fruit Belt, Jan., 1917.

Another writer in the same issue says: "One apple tree will bring in more net profit than an acre of hay. Two apple trees will bring in more net money than an acre of grain. The ripening dates are approximate average here; allow about five to seven days for each 100 miles north or south. The altitude will also affect the date of ripening.

each 100 miles north or south. The altitude will also affect the date of ripening.

Price of Two-Year Apple:	. 45	Per 10	Per 100
XX size, about 4½ ft. and up, 11-16 in. cal. and up, branched		\$4.50	\$40.00

Summer Apples

Duchess of Oldenburg—Excellent for cooking and market; good size; yellow, almost covered with red stripes; crisp, juicy, rather acid; July 15-august; a young, reliable bearer; very hardy.

Early Harvest—Bright straw; julcy, rich subacid; good; very early; bears rather young; productive.

Red June—Very red; juicy, brisk subacid, good; medium size. June, buly, a young bearer.

ductive.

Red June—Very red; juicy, brisk subacid, good; medium size; June-July; a young bearer.

Yellow Transparent—Good size; yellowish-white; fine grained, crisp, juicy, sprightly sub-acid; good for eating and cooking; mid June; hardy; a very young, regular and abundant bearer.

Autumn Apples

Maiden Blush—Large; clear yellow, crimson eheek; very juicy, sub-acid; mid autumn; good for cooking and drying; hardy; bears rather young.

Winter Apples

Arkansas Black—Medium large; almost biack; flesh yellow, firm, crisp, sub-acid; Dec.-March; unproductive on some solls; commands a good price where it can be grown.

Delicious—Roundish conic, medium to large, pale yellow, mostly covered with red, striped dark carmine; juicy; mild sub-acid; good. If ordered without other apples 2c each extra.

Grimes' Golden—Of best quality; beautiful golden yellow; medium to large; crisp, juicy, rich sub-acid, aromatle; fine dessert apple, good for cooking, especially fine canned; Oct.-Dec.; blooms late; hardy; bears young.

Ingram—A very late keeper; yellow, almost covered with bright red stripes; juicy, very mild sub-acid, good; blooms late; bears young and heavily.

Jonathan—Very attractive, lively deep red; high flavor; excellent for dessert, eooking and market; firm, crisp, juicy, very aromatic, mild sub-acid; Oct. and later; bears rather young.

Mammoth Black Twig—Greenish, largely overspread, dull, deep red, sometimes almost black; very firm, moderately juicy, sub-acid, good; keeps late.

spread, du very firm, keeps late.

Reagan; Black Ben Davis—Large; attractive rich red to maroon, rarely striped; firm, juicy, mild sub-acid; ships well, keeps well, bears young, regularly and abundantly; profitable.

Stayman Winesap—Large; attractive shape; greenish-yellow striped and often nearly covered with dark red; firm, crisp, very juicy, aromatic, sprightly pleasant sub-acid; very good; keeps late; bears young and regularly; less brilliant than the old winesap, but adapted to more solls and climates.

Winesan—Bright does a lateral of the sub-acid; were solls and climates.

Winesap—Bright deep red, flesh yellow, very rich, crisp, very juicy, sprightly sub-acld, very good; Dec.-March; bears young.

York Imperial—Large; attractive greenish-yellow shaded crimson; crisp, julcy, sub-acld, becoming mild; Dcc.; bears heavily and rather young.

Crab Apples

Transcendent—A large crab; golden yellow, crlm-son cheek; crlsp, julcy, subacld; Aug.-Sept.

ORDER EARLY BECAUSE TREES ARE SCARCE

Shall we send something similar if out of any varieties? If you don't tell us we have to use our judgment.

Money in a Family Orchard

Unless you already have a good family orchard there is no crop or combination of crops which can be grown on a small area that will equal in actual food value and satisfaction a good family orchard. In this case the word "orchard" should include all kinds of fruits, from the very earliest strawberries and dewberries to the latest apples, pears and quinces. Unless you have learned from experience, you cannot realize the almost endless variety of fruits which are possible in a family orchard. Did you ever know an orchard that started bearing in May and continued until frost, with some sort of fruit every day during that time? Yet it is possible and very easy to accomplish in almost all sections of the United States, excepting in the most northerly portions, where the month of May is too early. Unless you already have a good family orchard

Beginning with strawberries, the list runs through currants, raspberries, gooseberries, apples, peaches, pears and quinces. By the use of different varieties of these various fruits it is easily possible to have plenty of ripe truit every day during the season. Take a calendar and note the time of ripening of the early and late varieties of the different fruits listed, and see if you are not surprised at the possibilities offered in even a small family orchard.—The Fruit Grower. Grower.

Please Tell Us

Trees are scarce this season, more so than for years. Before spring is over many sizes and varieties will be sold out. Order early and have them reserved if you want later shipment.

them reserved if you want later shipment. Please tell us whether you would rather have a larger size at the larger price or a smaller size at the smaller price, if we should be out of the size you order. Also tell us whether you want us to send a similar variety if we are out of any variety ordered. If you do not want us to do so, mark "No Substitutions" on your order. If we substitute, the tree will be labeled with the correct name of the variety sent. For example, if we sent Stayman Winesap in place of Winesap it would be labeled Stayman Winesap.

If you do not tell us what to do we are obliged to use our judgment. We prefer to have your instructions.

Don't forget to tell us if your freight or express office is different from your postoffice.

Why We Don't Prepay

We ship express or freight collect because our We smp express or freight collect because our customers are so widely scattered that an average rate to all would be unfair to many in nearby states. If we prepaid we would have to do like anyone else who prepays—add it to the price we wanted to get and be sure to estimate it high enough so we wouldn't lose money on it.

If wanted by parcel post, allow extra for postage, unless you wish us to ship collect, which costs 13c more. Trees larger than 3 to 1 ft. cannot be sent by parcel post. In a few cases, strawberries for example, we name an amount to be sent if wanted postpaid, because on a right light package we can't miss it but a few cents anyway.

Cherries Netted \$10 Per Tree

Early Richmond Cherry is very productive

Expears mend had a number of choice cherry trees left in the nursery after the spring delivery was over and I did not like to destroy them. So I went to a friend and spent about one-half day endeavoring to make him see where he could make some money by planting a cherry orchard. I knew this man would give the trees good care and was sure he would succeed. He finally agreed, planted trees, gave them good care, and to date he has picked four crops of fruit from this orchard.

These trees, six years from planting, averaged thirty gallons to the tree for the 1915 He sold all of this fruit at the orchard at 40c a gallon, or at the rate of \$12 a tree Firking cost 6 c a gallon; spraying 20c a tree, or a total of \$2 a tree for spraying and pickg. leaving the income at \$10 a tree. So writes a Missouri nurseryman in the April 1,

Figgs 18 to 20 feet apart on well-drained ground. The list is arranged in the order

Price of Cherry: Each ADXX st. 1-for an ealiper up. 5 to 6 ft. branched \$0.65 NX str. 1-for and up. \$\frac{1}{2}\$ in caliper, branched .55 Each .5 ft. to 4 ft. \$\frac{1}{2}\$ to 9-16 in caliper, branched .45	Per 10 \$6.00 5.00 4.00	Per 100 \$55.00 45.00 35.00	
Sprial: Any five at the 10 rate, less at each rate; 50 or more at the 100 rate			

Enriv Richmond (May Cherry)—Medium size, wind, bright red, darker when fully ripe; very lives rightly add; latter May-June; hardy, very

Montmorency—Rather large, dark rich red; hith the sant acid; excellent; a week later than Lunn flichmond; vigorous, hardy, productive; successful everywhere.

Royal Duke—A half sweet enerry; very large; dark red; juicy; rich; mid to latter June; the nearest sweet cherry that succeeds here.

Standard size 1 yr. only, 21/2 to 31/2 ft., 40c each,

English Morello-Large, dark red, nearly black; flesh dark purplish crimson; julcy; rich acid; pro-lific; latter June-July dwarfish.

Wild Goose-Medium to large; bright red; sweet:

Shropshire Damson-European. A large Damson; dark blue; cling; latter Sept.; vigorous.

Wickson-Japan. Large, heart shaped dark red; flesh yellow, solid, meaty, sweet; cling.

Plum Trees

Price of Plum: Each	Per 10	Per 100
tandard size. 12 to % in. cal., about 51/2 to 41/2 ft., branched\$0.50	\$4.50	\$45.00
Special: Any five at the 10 rate, less at each rate; 50 or more at the 100 ra	ie.	

Abundance—Japan. Large, bright red over yel-w; juley, sweet, rich, very good; cling; mid-July; thetings bears young.

America—Medium to large; golden yellow with distinct red cheek; juicy; cling, July; hardy, productive; bears very young.

Burbank—Japan. Very large, bright, dark red on yellow; flesh yellow, firm, juley, rich, sugary; cling: latter July; bears profusely.

Gooseberries

THE DEMAND for Gooseberries is always good. They are easily grown, readily respond to care, and are reliable annual bearers. Plant 3x5 ft., 2,900 per acre; or 4x5 ft., 2.175 per acre. A northern slope is preferable, especially in the Central and Southern states.

Houghton—Of medium size, but a profuse bearer and a money maker. Very free from mildew, of easy cultivation; the best for most excions; glossy pale dull reddish brown when ripe, but usually picked green.

2-yr., 25c each, \$2.00 per 10, \$15.00 per 100. Downing-Medium to rather large, pale green, rood; productive; midseason.

2-yr., 30 each, \$2.50 per 10, \$20.00 per 100.

Peaches Bear the Third Year

Peaches often come into bearing the third year, and offer great opportunities for quick returns and good profits to the man who will take care of his trees. A Southern Missouri orchard three and four years old produced 65 cars on 110 acres. A Northern Arkansas orchard cleared \$100 per acre on four-year Elbertas Big returns? Why, even larger returns are not uncommon. We could tell you of reports of ever \$500 and \$600 per acre. But you don't have to make those big returns to make it pay well. They just illustrate the possibilities with suitable conditions and good

A sandy loam or gravelly soil is best, but the peach adapts itself to any well drained soil. If you have a choice of location, give them a northern slope. Planted 16x16 feet requires 170 trees per acre; 18x18 feet, 134 trees.

Price of One-Year Peach: Extra size, 9-16 to 11-16 in. cal., about 4 to 5 ft... Standard size, 7-16 to 9-16 in. cal., about 3 ½ to 4 ½ ft. Medium size, 2 to 4 ft. \$4.50 3.50 3.25

neaches.

Special: Any five at the 10 rate; less at each rate; 50 at the 100 rate.

The following list is arranged approximately more of ripening. Timate average season in this section;

Mayflower-The earliest; good size; red all over; semi-cling; good shipper; hardy; productive. Alexander—Very early; valuable for hardiness and vigor of tree; medium size; creamy, blotched red; juicy; very sweet; cling; x size only.

Arp Beauty—The earliest good yellow-fleshed peach; vigorons, productive, and hardier in bud than the average; yellow, heavily blushed; sweet.

Greeusboro—Large, creamy white, with a yellowish cast, beautifully colored crimson; flesh white, very juicy; an excellent early peach; middlene; hardy and a profuse bearer.

Carman—Large; creamy splashed red; julcy, rich, sweet, good; nearly free; hardy; productive.

Champion—Large; white, beautiful red cheek, flesh white, sweet, juicy, rich, delicious; freestone; early Aug.; quite hardy; bears young; productive.

Belle of Georgia—Very large; white, red cheek firm, julcy, high quality; freestone; early Aug.; hardy; very productive; excellent shipper.

Crawford Early—Large; yellow, deep red cheek; rich, slightly sub-acid; freestone; early August.

order of ripening. The dates named are approx-J. II. Hale—A little larger and firmer and trees and buds seem hardler than Elberta; whether it is adapted to as many kinds of soils is not yet determined. We do not expect it to drive Elberta from the market but to share it, as J. H. Hale is a few days the earlier. Sold only with other processes.

Elberta—Very large; golden yellow, crlmson check; firm, juicy, good; freestone; mid Aug.; excellent shipper; vigorous, productive, profitable.

Crosby-Orange yellow, splashed red; sweet, jnicy, rich; freestone; latter Aug.; medium size; hardy.

Crawford Late—Large; yellow, deep red cheek; juicy, rich; freestone; latter Aug.-Sept.

Indian Blood (ling-A red-fleshed peach much esteemed for pickling and preserving; productive.

Stump—Large; white, red cheek; flesh white, juicy, excellent; freestone; late Aug.-Sept.

Heath Cling—Very large; creamy white, sometimes faintly blushed; flesh white to the pit, rich, very julcy, sweet, fine; latter Sept.

Silway—Large; yellow, red cheek; flesh yellow, firm, julcy, sweet; good, free; late Sept.-Oct. Krummel's October—Large; yellow, red cheek; firm, Juicy, sweet, good; frcc; late Sept.-Oct.

Blackberries Begin Paying the Second Year

DROF. L. H. BAILEY says there is no fruit capable of yielding greater profits. Mr. R. B. Rushing says profits depend almost entirely on the management the patch receives. There will usually be from 150 to as high as 250 cases of 24 quarts from an acre, and that it is usually consistent to figure on an average of \$100 to \$150 per acre after paying for picking, boxes and express. This estimate was made several years ago

This estimate was made several years ago when prices were much lower.

Blackberries begin bearing the second year and may be depended upon for regular, profitable crops. They thrive in almost all soils, but are at their best in strong, deep loam that will retain moisture, tending towards clay rather than sand. They will succeed on soil too light, dry and poor for strawberries and raspberries. Plant 2 to 4 feet apart in rows 8 feet apart; 2 by 8 feet requires 2,725 plants per acre.

Early Harvest—The most profitable of all on account of its extreme earliness, hardlness and

Early Harvest—The most profitable of all of account of its extreme earliness, hardlness and productiveness; glossy black, firm and ships well growth strong. 45c per 10, 70c per 25, \$2.50 per 10u, \$20.00 per 1,000.

Dewberries Earlier Than Blackberries

WHEREVER there is a market for blackberries, dewberries will be profitable. Ripening between strawberries and blackberries, they command a good price. Land can be used that is too wet or not fertile enough for blackberries, and they are less expensive to grow. Plant 2 feet apart in rows 4, or preferably 5 feet apart requires 5,450 or 4,350 plants per acre, respectively.

Lucretia-Large, often 11/2 Inches long; sweet and luscious throughout; for size and quality is unexcelled by any of the blackberrles; ripens at

the close of the strawberry season before Early Harvest; the variety most extensively grown for market, 30c per 10, 50c per 25, \$1.75 per 100, \$15.60

Raspberry

Black Pearl-A little earlier than Cumberland: excellent quality; jet black; firm; hardy, vigorous. 40c per 10, 70c per 25, \$2.50 per 100, \$20.00 per

Grapes

Concord-The most popular; large, black, julcy, sweet; vigorous, very hardy, healthy, productive; mid to late August here. 20c each, 35c per 2, 50c per 3, \$1.40 per 10, \$12.00 per 100.

Moore's Diamond-Large, yellowish-green, julcy, good; ripens a little before Concord. 20c each, 35c per 2, 50c per 3, \$1.50 per 10, \$14.00 per 100.

Moore's Early-Black; about two weeks before Concord; desirable for home and market for its each, 45c per 2, 60c per 3, \$1.80 per 10, \$16.00 per 100.

Asparagus

Bonvalett's Giant-Grown largely for the Chlcago market; large shoots, purplish, but may be grown white by planting deeper.

Conover's Colossal-The standard market variety; very large; growth rapid, productive; good.

Columbian Manunoth White—A vigorous variety, producing white shoots of excellent quality. Grown from seed and sports some.

Early Giant Argenteuil-Noted for its earliness, productiveness and immense stalks; good.

Palmetto-Large, early, productive, good; very resistant to rust; adapted to North and South.

Prices of Above:

1-year, 50c per 25, \$1.00 per 100, \$7.00 per 1,000.

Washington-A new variety developed by the U. S. Department of Agriculture; bred especially for vigor and resistance to rust. 1-year, 25c per 10, 40c per 25, \$1.25 per 100, \$9.00 per 1,000.

Horseradish

Productive; so easily grown it should find a place in every garden; a rich, moist soil is preferable. Sets 5c each, 25c doz., \$1.50 per 100.

Rhubarb or Pie Plant

Rhubarb or pie plant is easily grown, yields abundantly and is easily prepared for market. The market demand makes it one of the best commer-cial vegetables. Early, just before Asparagus; tender, delicately flavored stalks. Plant 21/2 x4 feet, covering the crown 2 inches. secret of success is well drained soil.

2-year size......\$0.15 \$1.00 \$1.90 \$7.00

Strawberries

When planting imperfect flowered varieties (Columbia, Haverland and Warfield) every third or fourth row must be some perfect flowered variety to pollenize them. Freight shipment is not safe for strawberries. Planted 2 by 4 ft. requires 5,440 plants per acre.

Prices—All varieties except Progressive, \$1.00 100, \$8.50 per 1,000. Not less than 25 of a va-

If wanted by parcel post, add 5c per 25; 10c for 100; 15c for 200. This will sometimes be a little more, sometimes a little less than the postage, but

Aroma—A heavy bearer; very large; deep glossy red; firm; ships well; begins midseason and continues late; good; perfect flowered; money maker.

Columbia—A cross of Warfield and Gandy; large; attractive light scarlet; productive; late; imperfect flowered; Aroma and Gandy are good pollen-

Early Ozark—The largest extra early; bright red; firm; a good shipper; perfect flowered; productive.

Gandy—Very large; very late; bright red; firm; a good shipper; excellent on new or timber land; not successful on dry, sandy soil; perfect flowered. Haverland—Large, long, tapering; bright crimson; attractive; bears heavy; succeeds almost everywhere; imperfect flowered; Dunlap a good pollenizer.

Klondike—Medium early; dark red; good size; good for warm, sandy soils; perfect flowered.

Senator Dunlap—Dark glossy red, resembling Warfield but perfect flowered; rich, juicy, good; bears heavily; ships well; succeeds almost everywhere.

Warfield—Rich, deep red, which with its high quality is well retained when canned; midseason; imperfect flowered; Dunlap is a good pollenizer.

Everbearing Strawberries

Progressive—Bears the first summer and fall; particularly valuable for the home garden, especially if planted where they can be watered during the dry weather, when they will bear till freezing weather; good quality; good medium size; the early blooms should be clipped from newly set plants.

The U. S. Department of Agriculture says: "The plants are the most vigorous of all the everbearing now in the trade, and are, as far as observed, the hardlest variety of strawberry now grown in this country. \$1.00 per 25, \$3.00 per 100.

Pear Trees

 Price of Pear (Bartlett, 5c each higher);
 Each

 XX size, % to % in. callper, 4 to 6 feet...
 \$0.55

 Extra size, ½ to % in. callper, 4 to 5 feet...
 50

Pears are graded by caliper or diameter. The height is the approximate average and varies with the habit of the tree. Arranged approximately in order of ripening.

Clapp's Favorite—Large, yellow dotted and shaded red; juicy, perfumed; latter July-Aug.

Bartlett—Large, waxy yellow blushed; julcy, fine grained, buttery, rlch; latter Aug.; bears

fine grained, buttery, rich; latter Aug.; beats young.

Seckel—Small, but the richest and highest flavor; brownish-green, becoming yellowish brown; sweet, very julcy, buttery; early Sept.

Garber—Large, waxy yellow, red cheek; early Sept.; good for canning and market and for pollenizing others; hardy; vigorous; very resistant to

blight.

Anjou—Large, greenish yellow, red cheek; fine grained, melting, buttery, rich; latter Sept.

Duchess d'Angouleme—Very large, greenish yellow, dull red cheek; julcy, melting, slightly granular; Sept.-Oct.; productive, hardy, vigorous.

Keiffer—Very large, rich, yellow tinted red; very juicy; develops good flavor if ripened slowly in a cool, dark room; very resistant to blight, hardy, very productive, ships well, profitable pear; Sept.-Nov.; bears about the fifth year; plant Garber to pollenize lt.

DWARF PEARS

Dwarf Pear—Occupy little room, are valuable where space is limited and begin bearing younger, often the year after planting.

They may be planted 10 to 12 feet apart and kept headed back.

Duchess d'Angouleme—XX, 5% to 11-16 in. call-per 55c each, \$5.00 per 10, \$45.00 per 100.

ENCOURAGE THE CHILDREN. ENCOURAGE THE CHILDREN.
Embanase His children in their love for the beautiful. Give them a burdy guiden. Teach them and they will love them at beauty guiden. Teach them and they will love them all the more. Haven't sun often noticed how eagerly they watch lot the their blowers of springs. They delighted they are to get their lands on whatever happens to strike their names. Haven't you observed their delight in picking the Hawers in the woods, tree to all who come? Then lot them have a garden of their very own, where all sommer long they will first free to gother the flowers for themselves and their little friends.
